OBJECTIVE

Individual with 4 years software development experience . I make it my goal to create apps with the user perspective, creating applications with a useable and intuitive user interface, also understand the importance of creating highly readable, maintainable source code and automating processes through continuous integration and test driven development. I am eager to learn new technologies and look to ways to better myself in this rapidly changing industry. I have been recognised as true team player and a motivating leader of the pack.

WORK EXPERIENCE

Pace LLC Feb-2019 — Present
Android Developer

Total Informatics (Spain) Aug-2017 — Dec-2018
Android Developer

Shahi Sawari April-2016 — July-2017
Software Engineer(Android)

CERTIFICATIONS

- IEEE certificate of completion Microsoft Azure Hands on
- Microsoft Student Partner
- Microsoft Technology Associate in Software Development Fundamentals
- Microsoft Technology Associate in HTML-5 Application Development

EDUCATION

BS (IT) Sep-2011 — Dec-2015
University of Gujrat Pakistan
Bachelor of Science in Information Technology(16 Years)
CGPA: 3.31/4.0

ACHIEVEMENTS

- Microsoft Student Partner
- Member of Microsoft Developer Network (MSDN)
- Joined Microsoft BizSpark
- Got 1st position in Programming competition IT Department University of Gujrat
- Got 2nd position in Startup Weekend Islamabad 2015

SKILLS

- General (MVVM and MVP, Dagger2, SOLID Principles, Threading and Concurrency, Firebase)
- Programming Languages (Kotlin, Java, C#, XAML, SQL)
- Programming Frameworks / Platforms (Android, .NET, Entity Frame Work, LINQ to SQL)
- Databases(SQLite, MySQL, MS SQL Server)
- Programming Tools(Android Studio, Microsoft Visual Studio, NetBeans)
- Continuous Integration(Fastlane)
- Development Frameworks(Agile, SCRUM, JIRA)
- SVC (Git, Bitbucket)

NASCENT SKILLS

Kotlin CoRoutines, Room Database, Flutter

PROJECTS

- **Swyft Delivery**

Swyft is an on-demand delivery application to order anything, from anywhere, at any time, and have it delivered right to your door quickly and hassle-free. all you have to do is enter a pickup location and the delivery destination. Then, select the items you want to buy. It instantly connects you to one of our reliable drivers. Once your item is at your doorstep, the app will alert you to your invoice, and you can pay your driver in cash on the spot. <https://play.google.com/store/apps/details?id=delivery.swyft.customer>

- **Shahi Sawari**

Shahi Sawari monthly pick and drop services are designed for daily commute to and from school, college and workplace while keeping convenience, safety and affordability in mind. Using the app one can Track their trip on the mobile app and can share live location with loved ones for added safety. Book for a month and forget the hassle of daily bookings. Get picked up from your doorstep and drop back at the same time daily. <https://play.google.com/store/apps/details?id=shahisawari.pk>

- **Dani's World Super Adventure Android Game**

Super Mario Clone game but much more than that, made in AndEngine (2D game development). This game is in top 10 adventure games in the world and have many options like change character, buy things and many more. This game was mainly developed by game developers in my supervision then have been modified by me, I have added the Player changing Functionality, Android In-app purchases, Google ads and Unity ads. On store (<https://play.google.com/store/apps/details?id=com.daniworld.super.adventure>)

- **Advance Android Video Player**

Developed Video player for android with **lib VLC** having some additional controls like screen in screen mode, pinch zoom-in and zoom-out and audio-controls with equalizer. used android splits to make separate apk for separate android architecture devices.

- **Snake Android Game**

A 2D snake game that use device **accelerometer sensor** to change the snake's direction. developed in Android SurfaceView.

- **Android Best Cleaner**

An android utility application to manage your android phone it helps user to with overused RAM, CACHE, low Battery and overheated CPU notification to manage is an efficient way and also have very cool looking lock screen <https://play.google.com/store/apps/details?id=com.nathe.bestcleaner>.

- **BOL B**

A system that turns android based smart phone into "Smart Microphone" and facilitate the user to rate their favourite Presenter/Speaker and communicate with him/her through text or voice.

Android Application is for audience to communicate, through this application users can send a written text question to the Presenter/Speaker and presenter can reply from his/her android app and can also transmit their voice and rate the presenter.

Web Panel (for Presenters/Speakers) is used to manage and create different types of events and view the response in different managed way. Developed using PHP, SQL Server 2012, WCF and Azure.

Desktop Application provides the facility to manage the overall event communication with cloud through WCF and android application over the network. It store and sync the event data (rating provided by users) to the cloud server. Developed using WPF (XAML, C#).
